

Hydronic Balancing Solutions

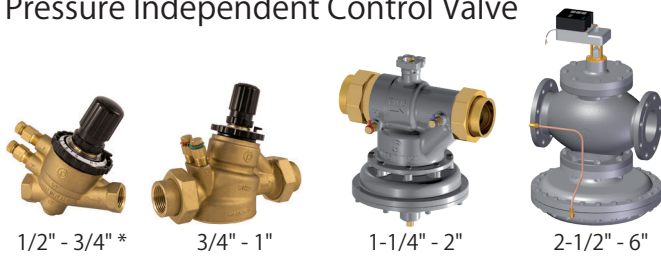

Jomar Hydraulics's continuing commitment for over 25 years has been to provide quality, innovative, and energy efficient hydronic balancing products for the HVAC industry. We specialize in pre-assembled coil piping packages, components and accessories for pressure independent, automatic or manual balancing applications.

Our experienced sales and technical support staff are available to assist you in selecting the best balancing solution that fits your project needs.

HCI's complete line of hydronic balancing kits and components are designed to meet your system design conditions to produce a balanced system. The result is a superior system that provides both a comfortable and energy efficient climate.

Terminator PICV

Pressure Independent Control Valve

- Differential Pressure Regulator
- External Flow Presetting Dial
- Axial Control Valve*
- Location Tag
- PT Ports
- 360 WOG
- Control Range: 5 -60 PSI

Pressure Dependent	Field Adjustable	Constant Flow	Pressure Independent	Auto Temp Control
	✓	✓	✓	✓

Terminator A

Automatic Balancing Valve

- Automatic Flow Cartridge
- Integrated Ball Valve**
- Union**
- PT Ports
- Location Tag
- 600 WOG

Pressure Dependent	Field Adjustable	Constant Flow	Pressure Independent	Auto Temp Control
		✓	✓	

Terminator B

Venturi-Fixed Orifice Balancing Valve

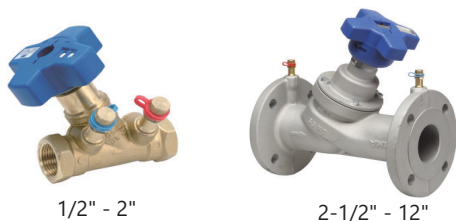

- Venturi - fixed orifice
- Integrated Shut-off Valve
- Memory Stop
- Union***
- PT Ports
- Location Tag
- 400 WOG

Pressure Dependent	Field Adjustable	Constant Flow	Pressure Independent	Auto Temp Control
✓	✓			

Terminator GV

Variable Orifice - Globe Style Balancing Valve

- Integrated Shut-off Valve
- Memory Stop
- PT Ports

Pressure Dependent	Field Adjustable	Constant Flow	Pressure Independent	Auto Temp Control
✓	✓			

Terminator Six Way

The Terminator Six Way T6 Series is designed to connect a four pipe system to a single coil and provide modulating heating/cooling control and coil isolation in a single compact body. Taking place of four control valves, our six way valve drastically simplifies the installation process while saving time and money.

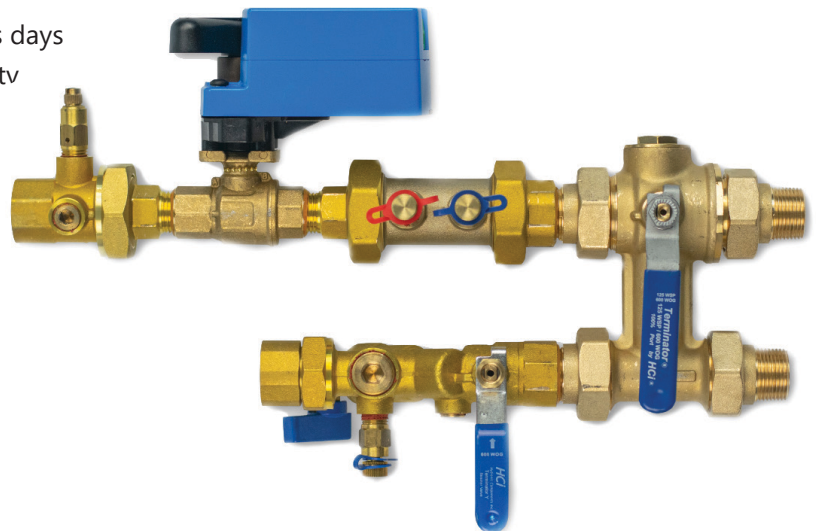

- Characteristic Curve: Linear
- Cv: Field Adjustable
- Size: 1/2" and 3/4"
- Total Operation Angle: 90°
- First Side Operation Angle: 0-32°F
- "Dead Zone" Operation Angle: 32-58°F
- Second Side Operation Angle: 58-90°F

Coil Kits: Features and Benefits

The Jomar Hydronics Terminator System® coil piping package has help transform the HVAC industry with completely customizable balancing valve packages that meet the unique needs of every application and system design.

- PICV, Automatic, and Manual balance valve solutions
- Assemblies available in sizes from 1/2" to 2"
- Individual components provided for sizes over 2"
- Wide variety of accessories
- Tagged, bagged and boxed for each individual project
- Reduced installation time and labor costs
- Standard orders ship within 10-15 business days
- Backed by Jomar Hydronic's 5 Year Warranty
- 100% tested

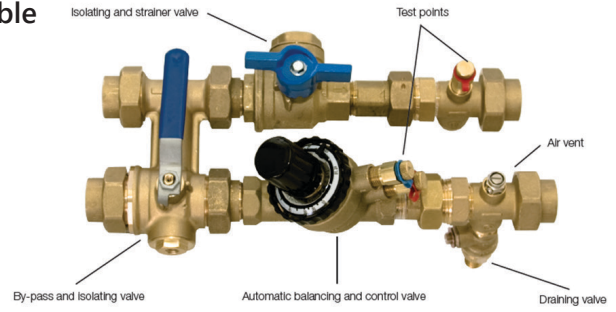

Unions

Terminator U
Union with PT Port

Flushing Bypass Kits

Up to 2" Available

Strainers

Terminator Y
Y-Pattern Combination
Strainer & Shut-off Valve

Control Valves and Actuators

Zone Valves & Actuators
1/2" - 1"

Globe Valves & Actuators
1" - 12"

Hoses and Accessories

1/2" - 2" Flexible Hoses*

Other parts and accessories available

PT Ports
Handle Extensions
Memory Stops

Blowdown Drains
Manual Air Vents
Various Ball Valves

Custom Assemblies
And More!

* 12" - 36" Lengths Available
